Secto Design Oy owns and controls all the intellectual property rights of the designs of its products and related material such as photos and drawings. All use of Secto Design Oy's intellectual property rights without written permission is strictly prohibited. Secto Design Oy takes the protection of intellectual property rights very seriously. If Secto Design Oy's intellectual property rights have been used without permission, legal proceedings might be brought against the interfering party, seeking monetary damages and/or an injunction to stop infringing the rights. Legal cost payments may result.

Secto Design

From Finland

Secto Design is a Finnish company specialising in design lamps handmade from premium PEFC-certified Finnish birch wood. The demanding work is carried out by highly talented local craftspeople in Heinola, Finland.

The majority of the lamps in the lighting collection are designed by the award-winning Finnish architect Seppo Koho. The wooden warmth of the Secto Design lamps suits various tastes. About 95% of the lamps are exported to over 80 different countries around the world. The clear and interesting architectural forms of the lamps are appreciated by both private clients and professionals alike.

“The respect for Northern wood, clear Scandinavian design and professional woodworking is the basis of the Secto Design lighting collection.”

Tuula Jusélius, Founder

The beginning

The founder of Secto Design, Tuula Jusélius and designer Seppo Koho met in 1995. From the very first meeting, they knew they were kindred spirits; they both shared a respect for Northern wood as well as for Scandinavian design and professional woodworking.

Tuula Jusélius and Seppo Koho began their collaboration on innovative wooden furniture, which quickly gained success. However, customers faced a challenge: no wooden lamps were available to complement the furniture. This inspired the creation of the conical Secto 4200 pendant, which became the backbone of the entire Secto Design collection of wooden lamps.

Going international

Over the years, Secto Design has built a comprehensive worldwide retailer network and is represented widely across the world. To strengthen its presence in the international market, Secto Design has developed business entities in Sweden, Denmark, France and the USA.

Along with the new models and increasing national and international demand, what originally was a small workshop in Heinola has now grown into a busy factory with about 40 employees. Since 2017, the factory, Sectomo, has been owned entirely by Secto Design. The CEO of Sectomo, Joakim Jusélius, represents the second generation of the family-owned design lighting company.

Innovative with artisanal touch

When introduced, the new Secto 4200 pendant was a real innovation and unique. It took a considerable amount of time and effort to find a craftsman capable of producing Secto lamps in large quantities yet still maintaining the artisanal touch. The new wooden lamp and its delicate light attracted people. Wood as a lamp material was welcomed to the lighting market with surprise and astonishment. Today, the collection comprises 32 different models and keeps up its steady growth. All lamps are CE-marked, and 19 lamp models are now also ETL/CETL-certified.

Protecting originality

The unique wooden structure of Secto Design lamps has attracted some unwanted admiration as well. The battle against piracy, promoting original design and valuing the skills of Finnish craftsmen are extremely important for Secto Design. Regardless of the time-consuming task of monitoring the market for replicates, Secto Design is very committed to standing behind its IPR rights. All Secto Design lamps are now marked with a hologram sticker when leaving the factory to help customers recognise the original Secto Design product from a fake one.

Secto Design cooperates with both Love Original and Be Original Americas organisations that combat counterfeit design, support authentic creative work and protect the history of design and the future of innovation.

Designers

Collaboration has always been at the heart of Secto Design. From the very beginning, architect Seppo Koho’s close partnership has defined the distinct, architectural character of the collection. Having designed most of its models, he continues to shape the brand’s recognisable aesthetic through his clear sense of form and light. Designer Ilkka Kauppinen adds a new voice to this ongoing dialogue, sharing the same respect for wood and thoughtful design through his contribution — the Adilo pendant lamp.

Designer
Seppo Koho

“I truly enjoy turning sketches into wooden prototypes with my own hands. Finding a concrete solution to implementing a detail after persistent experimenting is a fascinating moment.”

Seppo Koho, Architect & Designer

Architectonic touch

Secto Design has collaborated closely with architect Seppo Koho (b. 1967) since the company’s founding in 1995 — initially on furniture and, from 2002 onwards, exclusively on lamps. A promising interior designer freshly graduated from the University of Art and Design Helsinki at the start of the collaboration, Koho later expanded his expertise by earning an architecture degree from Tampere University of Technology. Today, he is an internationally recognised lighting designer, running his own design studio.

Koho’s architectonic touch is evident throughout the Secto Design lighting collection. He describes his lamps as illuminated spaces viewed from the outside — much like cosy houses radiating a warm glow on a dark evening. Versatile and timeless, the luminaires suit both public and private interiors, embodying the principles of good design that have guided the company’s philosophy from the very beginning.

Design philosophy

Seppo Koho not only designs the lamps but also handcrafts the first prototypes himself. He has always been fascinated by wood and the possibilities it offers as a living material. Crafting a wooden prototype of a new lamp often resolves design challenges that no computer drawing can solve.

Koho aims to create lamps that provide harmonious light without the harsh glare of visible bulbs. In all Secto Design lamps, the light source is hidden, allowing the light itself to emerge through soft, intricate patterns on surrounding surfaces. The play of light and shadow, combined with the warmth of birch, gives Koho’s minimalist designs their poetic allure — a quality that continues to captivate people around the world.

Designer
Ilkka Kauppinen

“The moment of discovery — when a hypothesis turns into genuine understanding — gives me great joy. Whether I’m proven right or wrong is not the point. What matters is understanding how things work.”

Ilkka Kauppinen, Designer

Insight through the process

The collaboration between Secto Design and Ilkka Kauppinen (b. 1988) builds on shared values of integrity, craftsmanship, and experimentation. Trained first as a wood artisan in Joensuu and later as an industrial designer at the LAB Institute of Design and Fine Arts, Kauppinen approaches each project with equal measures of precision and curiosity. These roots in hands-on making continue to define his practice, where physical prototyping is not merely a tool but a way of thinking.

Having explored everything from urban farming to greenhouse technology, Kauppinen describes his career as an ongoing experiment — one that includes missteps, small victories, and, ultimately, the Adilo pendant lamp, developed in partnership with Secto Design and launched in 2025.

Shaped by curiosity

Kauppinen’s design process begins with a hypothesis, which he tests through sketching, modelling, and, above all, building. Prototypes are essential to discovering how an object behaves in space — something that can never be fully understood through drawings or virtual models alone. The process often challenges intuition, revealing unexpected truths and reshaping the original concept.

Central to his work is the use of wood, chosen for both its structural and aesthetic qualities. In the Adilo lamp, the pale surface of ultra-thin birch plywood gently reflects and diffuses light, shielding direct glare while allowing a warm glow to pass through. The result is an inviting atmosphere that suits both public and private settings — a testament to his belief in design that enlightens in more ways than one.

Environmental and social responsibility

Sustainability is our core principle. Our lamps are made from locally sourced Finnish birch, a renewable, carbon-binding natural material, and provided with LED technology for energy efficiency. Our production relies on renewable energy, and we are constantly looking for ways to minimise waste and introduce even more ecological materials in our packaging.

Our practices align with the United Nations’ Sustainable Development Goals (SDGs), and we have conducted a thorough Life Cycle Assessment (LCA) for all our products according to EN 15804 standards. Based on these, we began publishing individual Environmental Product Declarations (EPDs) for our lamps in 2025. EPDs are independently verified documents that provide transparent information on a product’s environmental impact. They are available in the international EPD System’s online library and accessible through our website.

Welcome to browse and download our Sustainability report and explore detailed information on our approach to sustainability and social responsibility on our website:

Sustainability

Social responsibility

Birch

Birch

Strong yet resilient Finnish birch is a perfect and durable material for form-pressed shapes like the ones in the Secto Design lamps. Birch used for the Secto Design lamps grows in PEFC-certified commercial forests. The certification guarantees ecologically, socially and economically sustainable forestry. The certification also makes the supply chain transparent. Certified birch wood can be traced back to the forest where it was logged.

The Secto Design shades are well known for their workmanship and beautiful details. Wood being a natural material, some small variations are normal. To ensure the highest quality, all products are inspected 8–10 times during the manufacturing process.

Classic innovation

The very first Secto pendant. An innovative modern classic, that led to the birth of the Secto Design collection. Designed by Seppo Koho, launched in 1999.

Secto 4200 pendant lamp

Finishes	Shade	Cable + ceiling cup
	● Natural birch	White
	○ White laminated	White
	● Black laminated	Black
	● Walnut veneer	White
Material	Form pressed birch slats	
Dimensions	Height 60 cm	
	Diameter Ø 30 cm	
	Weight 1,4 kg	
Voltage	220–240 VAC, 50 Hz	
Light source	E27, LED max. 20 W, incl. Check the website for more details.	
Dimming / DALI	Check the website for details / latest information.	
Cable	150 cm, textile cable, ceiling plug/connector, ceiling cup	
Classification	Ingress Protection IP20	
	IEC Protection Class II	
	CE marking (ETL/CETL certified: see p. 82)	

Modern and approachable

The smaller Secto pendant suitable for spaces with lower ceilings.
Impressive in rows and larger groups.
Designed by Seppo Koho, launched in 2000.

Creative solution

An adjustable suspension arm for the use of the classic Secto Design pendants in new and creative ways!
Designed by Seppo Koho, launched in 2015.

Varsi 1000 suspension arm

Finishes	Color ● Black	Cable Black	Arm Black
Material	Fine textured powder coated steel		
Dimensions	Height 41 cm Length 130–170 cm, adjustable Weight 3,8 kg (without the pendant) Rotation 180 degrees		
Voltage	220–240 VAC, 50 Hz		
Dimming / DALI	Check the website for details / latest information.		
Cable	800 cm, textile cable, wall plug, switch on the cable		
Classification	Ingress Protection IP20 IEC Protection Class II CE marking		
Instructions	Please refer to the separate instructions on the website.		
Information	Varsi comes with the selected pendant. Varsi can be used with Secto 4200, Secto Small 4201, Octo 4240, Octo Small 4241, Victo 4250, Victo Small 4251, Puncto 4203 and Kontro 6000.		

Product overview

Handmade in Finland

Secto Design shades are made from certified, premium birch veneer that is form-pressed into blanks. The blanks are cut into slats, which are sanded and finally connected using rings of thin plywood. The slats are glued and nailed to the rings. All Secto Design lamps undergo a thorough quality inspection before they are sent to their final destination.

The finishing options for the shades are untreated natural birch, white or black laminate or waxed walnut veneer. Other colours can be customised for projects at extra cost. The light distribution curves of the Secto Design lamps, as well as further information on particular models, can be found on our website.

LED bulbs

The majority of Secto Design lamps use LED bulbs as a light source. The recommended colour temperature is pure white, 3000 K (daylight being 6500 K). For security reasons at least 15 mm of space should be left between the bulb and the shade to allow air to circulate. If a dimmer is used, please check the compatibility of the dimmer with the light source. The use of special bulbs such as halogen, mirror or 12 V is forbidden due to overheating.

In Europe, all the lamps are delivered with a light source: a suitable bulb or a built-in LED. Most of the E27-fitted lamps come with a dimmable Philips CorePro LED bulb with adjustable colour temperature. The bulb is an example of a suitable light source for the model in question. There might be variations in the bulbs due to supply. The guarantee of the lamps does not cover the sample bulbs.

Built-in LED

The built-in LEDs are included worldwide in the Owalo, Aspiro, Atto and Kuulto lamps. The current life span estimation of LED is approximately 15 000 hours.

The Secto Design LED lamps use high-quality LEDs. Secto Design reserves the right to replace the current LED components with similar or better ones due to the rapid development of LEDs and changes in supply.

It is recommended to use dimmers optimised for built-in LEDs. The cable and the built-in LEDs can only be replaced by the manufacturer.

Cables

The colour of the cable depends on the lamp model and the colour of the shade. The standard cable colours are listed in the product information of each model.

A ceiling cup and a connector are included in the cable set of the pendant lamps. The Magnum and Owalo pendants are equipped with balancing steel wires. The wall lamps come with a cable and a switch or, alternatively, with a direct wall mount option. The cables of the table and floor lamps in the Owalo family have a LED driver. The cables or any other parts used in Secto Design lamps should not be replaced for safety reasons. Secto Design is not responsible for any damages caused by modifications.

Please regularly ensure that the ring of the lamp holder, which supports the wooden shade, is tightly fastened.

Important

Secto Design lamps are thoroughly tested, and they comply with all the requirements for CE marking. The models marked with “ETL/CETL” on the North American site are also available with ETL/CETL cabling.

Secto Design Oy is liable for manufacturing flaws when notice is given within a reasonable time. As the lamps are handmade from birch wood please be aware that, as with every birch tree in the forest, every Secto Design lamp is unique, too. Therefore knots and other natural variations are normal.

All the original Secto Design lamps manufactured since December 2017 are sealed with a hologram label.

Lighting control systems

Check the website for the latest information.

Installation and maintenance

When necessary, the assembly and installation instructions are available for downloading on the product pages. Please note that the pendants should not be installed closer than 15 cm from the ceiling in order to let air circulate. Secto Design lamps can not be installed above a stove, a washbasin or other sources of humidity.

For the maintenance of the wooden shades, wipe dust regularly. To remove fresh stains wipe with a slightly damp cloth.

NB.

- Please check the product pages for detailed information.
- All given details are as precise as possible.
- The guarantee of the lamps does not cover the example bulbs.
- All original Secto Design lamps carry a hologram sticker.
- Secto Design Oy reserves the right to changes.

For professionals

Useful information including 3D-models, LDT, instructions etc. for architects and other project clients is available on our website:

ETL/CETL certified models

as of November 2025, check the website for the updated info on the certified models

Secto 4200 pendant lamp

Dimensions	Height 23.6 in Diameter Ø 11.8 in Weight 3.1 lb
Light source	E26 (max. 22 W) or GU24 (max. 17 W)
Cable	8 ft, textile cable, ceiling connector, ceiling cup

Secto Small 4201 pendant lamp

Dimensions	Height 17.7 in Diameter Ø 9.8 in Weight 2.6 lb
Light source	E26 (max. 22 W) or GU24 (max. 17 W)
Cable	8 ft, textile cable, ceiling connector, ceiling cup

Magnum 4202 pendant lamp

Dimensions	Height 34.3 in Diameter Ø 22.0 in Weight 9.3 lb
Light source	E26 (max. 22 W) or GU24 (max. 17 W)
Cable	8 ft, textile cable, ceiling connector, ceiling cup, 3 steel wires

Puncto 4203 pendant lamp

Dimensions	Height 15.7 in Diameter Ø 17.7 in Weight 2.9 lb
Light source	E26 (max. 22 W) or GU24 (max. 17 W)
Cable	8 ft, textile cable, ceiling connector, ceiling cup

Secto 4210 floor lamp

Dimensions	Height 68.9–72.8 in, adjustable Shade Ø 11.8 in Base Ø 13.4 in Weight 14.8 lb
Light source	E26 base, LED max 20 W
Cable	7.5 ft, plastic cable, switch on the cable

Secto 4220 table lamp

Dimensions	Height 29.5 in Shade Ø 9.8 in Base Ø 11.0 in Weight 8.6 lb
Light source	E26 base, LED max 20 W
Cable	7.2 ft, plastic cable, switch on the cable

Secto 4230 wall lamp

Dimensions	Height 23.6 in Depth 3.5–7.1 in Width 5.1–12.2 in Weight 2.4 lb
Light source	E12 base, LED max 20 W
Cable	7.9 ft, textile cable, switch on the cable. Also available with direct wall mounting.

Secto Small 4231 wall lamp

Dimensions	Height 17.7 in Depth 3.5–5.9 in Width 5.1–9.8 in Weight 2.0 lb
Light source	E12 base, LED max 20 W
Cable	7.9 ft, textile cable, switch on the cable Also available with direct wall mounting.

Octo 4240 pendant lamp

Dimensions	Height 26.8 in Diameter Ø 21.3 in Weight 4.4 lb
Light source	E26 (max. 22 W) or GU24 (max. 17 W)
Cable	8 ft, textile cable, ceiling connector, ceiling cup

Octo Small 4241 pendant lamp

Dimensions	Height 21.6 in Diameter Ø 17.7 in Weight 2.9 lb
Light source	E26 (max. 22 W) or GU24 (max. 17 W)
Cable	8 ft, textile cable, ceiling connector, ceiling cup

Victo 4250 pendant lamp

Dimensions	Height 18.9 in Diameter Ø 22.0 in Weight 3.5 lb
Light source	E26 (max. 22 W) or GU24 (max. 17 W)
Cable	8 ft, textile cable, ceiling connector, ceiling cup

Victo Small 4251 pendant lamp

Dimensions	Height 15.5 in Diameter Ø 17.7 in Weight 2.2 lb
Light source	E26 (max. 22 W) or GU24 (max. 17 W)
Cable	8 ft, textile cable, ceiling connector, ceiling cup

Petite 4600 pendant lamp

Dimensions	Height 9 in Diameter Ø 7.9 in Weight 1.8 lb
Light source	GX53 base, LED max 7 W
Cable	15 ft, textile cable, ceiling connector, ceiling cup

Petite 4620 table lamp

Dimensions	Height 22 in Depth 11 in Width 7.9 in Base Ø 7.1 in Weight 7.9 lb
Light source	GX53 base, LED max 7 W
Cable	7.2 ft, plastic cable, switch on the cable

Atto 5000 pendant lamp

Dimensions	Height 8.3 in Diameter Ø 13.4 in Weight 4.6 lb
Light source	A built-in LED, 12 W, 3000 K, 1400 lm, CRI > 80
Cable	15 ft, textile cable, ceiling connector, ceiling cup

Kumulo 5200 pendant lamp

Dimensions	Height 21.3 in Diameter Ø 21.7 in Weight 5.3 lb
Light source	GX53 base, LED max 12 W
Cable	15 ft, textile cable, ceiling connector, ceiling cup

Kontro 6000 pendant lamp

Dimensions	Height 8.3 in Diameter Ø 17.7 in Weight 3.5 lb
Light source	E26 (max. 22 W) or GU24 (max. 17 W)
Cable	8 ft, textile cable, ceiling connector, ceiling cup

Owalo 7000 pendant lamp

Dimensions	Height 5.1 in Lengh 39.4 in Width 3.5 in Weight 6.8 lb
Light source	A built-in LED, 22 W, 3000 K, 2800 lm, CRI > 80
Cable	15 ft, textile cable, connector, ceiling cup, 2 steel wires

Teelo 8020 table lamp

Dimensions	Height 15 in Depth 13 in Diameter Ø 4.3 in Weight 2.2 lb
Light source	E26 base, LED max 20 W
Cable	7.2 ft, textile cable, switch on the cable

The Adilo 8200 and Adilo Small 8201 pendant lamps will be ETL/CETL certified in 2026.
